

September 11-14, 2017

The 7th German-Russian Week of the Young Researcher

COMPUTATIONAL BIOLOGY AND BIOMEDICINE

The German-Russian Weeks of the Young Researcher taking place once a year in Russia have the main goal to encourage wider networking and stronger partnerships among early career scientists.

This year doctoral and postdoctoral researchers are invited to come together to Skoltech and present their research projects in the area of «Computational Biology and Biomedicine» as well as to interact with and gain experience from professors in the fields.

Participants will take an interdisciplinary approach and will discuss particular topics of interest such as challenges of genotype/phenotype relations, impact of computational biology on health care systems and further applications, the challenges to educate researchers in using computational concepts and techniques to understand big data, and the impact of Big Data for future personalized health care.

To attend the 7th German-Russian Week of the Young Researchers and participate in the Poster Exhibition please register at the event website 7thweek.skoltech.ru/registration and submit an abstract of the poster

REGISTRATION AND SUBMISSION DEADLINE – August 27, 2017
